Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No.		Applicant(s)	
	10/670,275		KIMURA, MUTSUMI	
	Examiner		Art Unit	
	Thanh T. Nguyen		2813	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 07 September 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-8 and 15-21 is/are pending in the application.
- 4a) Of the above claim(s) 20 and 21 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-8, 15-19 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Request for Continued Examination

The request filed on 9/7/05 for a Request for Continued Examination (RCE) under 37 CFR 1.114 is acceptable and an RCE has been established. An action on the RCE follows.

Election/Restrictions

Newly submitted claims 20-21 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: the device claims withdrew on the action dated 4/6/05.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 201-21 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2813

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8, 15-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Iwafuchi et al (U.S. Patent Publication No. 2002/0096994A1).

Referring to figures 1-12, Iwafuchi et al. teaches a method of manufacturing an electro-optical device (see paragraph# 142), the method comprising:

Forming a plurality of chips (devices) each of which includes a drive circuit on a first substrate (52/91c, see figures 3-5, 13-16, paragraphs# 175-177, 183-185, 186-196);

Forming wires (81/82) for connecting one of the plurality of chips with a plurality of pixel electrodes on a second substrate (80, 95, see figures 11-14, paragraphs# 136-151, 182-183, 185);

Transferring at least one of the plurality of chips from the first substrate onto the second substrate (40/95, see figures 11-14).

Regarding to claim 2, forming a plurality of pixel electrodes on the second substrate after the forming wires (see figure 14-15, paragraph# 184-185).

Regarding to claim 3, forming a plurality of electro-optical elements on the second substrate after the forming of the plurality of pixel electrodes (see figure 14-15, paragraphs# 184-185).

Regarding to claim 4, forming of the plurality of chips including forming a plurality of first connection terminals on a face of each of the plurality chips (see figures 5, 11-12).

Regarding to claim 5, the plurality of first connection terminals being arranged in a deposition of two lines (see figures 5, 11-12).

Regarding to claim 6, the wires including a plurality of second connection terminals connected with pixel electrodes (see figures 11-12).

Regarding to claim 7, the transferring at least one of the plurality of chips including fixation of the plurality of chips by connecting each of the plurality of the first connection terminals with at least one of the plurality of the second connection terminals (see figures 11-12).

Regarding to claim 8, the transferring at least one of the chips including forming an adhesive layer on the first connection terminals or the second connection terminals (see figure 11-12, paragraphs# 182-183).

Regarding to claim 15, forming of the plurality of chips including forming a peeling layer (72) between the plurality of chips and the first substrate (see paragraph# 180, figure 12).

Regarding to claim 16, the peeling layer (72) being formed of a material having a bond that is weakened by application of an energy (see paragraph# 179-180).

Regarding to claim 17, the drive circuit controlling a plurality of electro-optical elements (see paragraph# 183-184).

Regarding to claim 18, the drive circuit including a first transistor for controlling current flowing in the at least one of the plurality of electro-optical elements and second transistor for operating the first transistor in accordance with input signals (see paragraphs# 154, 183-191).

Regarding to claim 19, drive circuit including a plurality of first transistor for each of which controls current flowing in the at least one of the plurality of electro-optical elements and a plurality of second transistors whose gates are connected by common line (see figure 1).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thanh Nguyen whose telephone number is (571) 272-1695, or by Email via address Thanh.Nguyen@uspto.gov. The examiner can normally be reached on Monday-Thursday from 6:00AM to 3:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Carl Whitehead, Jr., can be reached on (571) 272-1702. The fax phone number for this Group is (571) 273-8300.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0956 (See **MPEP 203.08**).
